Working Schedule

	1st cargo leave Japan to BNL
2	shipped material quick check
2	support frame for NaI/target setup
2	cabling at area
2	cabling at counting house
1	chamber gas preparation
1	ID/FD chamber startup
1	support frame survey
2	NaI mount
1	DAQ startup for NaI calibration
	48D48 magnet power on
2	NaI calibration
1	BD chamber startup
1	live target preparation
	48D48 magnet power off
	D6 beam line magnets on
1	comparator setting
	48D48 magnet power on
2	counter check with beam
1	DAQ startup for experiment
1	beam line tuning
2	beam energy calibration by TOF
1	beam line tuning again
3	debug and threshold adjust
2	start data taking
1.5	offline analysis for debug
